

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## PROCEEDINGS OF THE NEW YORK ENTOMOLOGICAL SOCIETY.

MEETING OF MAY 21, 1895.

Held at the American Museum of Natural History.

President Zabriskie in the chair. Ten members present.

Dr. E. G. Love and Mr. Martin Birnbaum were proposed for active membership by Mr. Beutenmüller.

An invitation from the Newark Entomological Society to attend their field meeting on Decoration Day, at Orange, N. J., was received and accepted with thanks.

A lot of rare insects from Florida and New Hampshire were donated to the Society by Mrs. Slosson with the request to sell them for the benefit of the JOURNAL. On motion a vote of thanks was extended to Mrs. Slosson.

Mr. Palm spoke on collecting insects and exhibited his apparatus. Adjournment.

MEETING OF JUNE 4, 1895.

Held at the American Museum of Natural History. President Zabriskie in the chair. Twelve members present.

Dr. E. G. Love and Mr. Martin Birnbaum were elected active members of the Society.

Mr. Zabriskie told how the foot stalks of the leaves of the maples at Flatbush, Long Island, were injured by some insect which caused them to fall, but was unable to detect species.

A discussion as to the merits of sweeping and beating for insects was held by Messrs. Palm, Schaffer and Münch.

Mr. Münch described his collecting trip to Delaware Water Gap with Messrs. Palm and Ditmars.

Adjournment.
